

ECOMEMBRANE SIGNS A PARTNERSHIP WITH ENERGY DOME TO IMPLEMENT A PRODUCTION UNIT AIMED AT DESIGNING AND MANUFACTURING DOUBLE MEMBRANE GASOMETERS APPLICABLE TO CO2 BATTERY TECHNOLOGY

Gadesco Pieve Delmona, 9th may 2025 – Ecomembrane S.p.A. (hereafter “Ecomembrane” or the “Company”, ISIN IT0005543332), leading company in the design and construction of gas storage and containment systems for the production of green energy, listed on the EGM segment of Borsa Italiana S.p.A., announces that it has signed a partnership agreement with Energy Dome S.p.A. (“Energy Dome”), a cutting-edge company in the field of long-duration energy storage (LDES), aimed at implementing a production unit for the engineering, design and manufacture of double-membrane gasometers and the commissioning of the same at the CO2 Battery plants owned exclusively by Energy Dome.

Ecomembrane will be responsible, in particular, for the management and coordination of manufacturing activities, which will be carried out by its own direct and indirect personnel, as well as for the engineering and design of the membranes. Energy Dome will be responsible, in particular, for the provision of the site on which the manufacture of the double membrane gasometers will then be implemented, and for the purchase, at its own care and expense, of all materials and components necessary for the manufacture.

The agreement will have a duration of 6 years and provides, in favour of Ecomembrane, in addition to an initial set-up fee, fixed fees for the activity of management, coordination and optimization of production and variable fees for the engineering activity based on the number of gasometers built, as well as a mark-up on the cost of direct and indirect personnel made available by the Company for the production unit.

Lorenzo Spedini, CEO of Ecomembrane, said: *“This partnership with Energy Dome, a pioneer in the field of long-duration energy storage (LDES), and with whom we have already been collaborating for some years, confirms the excellent work done so far in this area and Ecomembrane's ability, probably the only one among its competitors, to serve customers and advanced technologies in the field of Green Transition, will also allow us to rationalize our resources among the different business lines: biogas, CO2 and solar and guarantees a long-term commercial agreement functional to the growth of volumes”.*

Information about Ecomembrane

***Ecomembrane S.p.A.**, with registered office in Gadesco Pieve Delmona (Cremona) and North Little Rock (Arkansas, USA), has been operating in the renewable energies and biogas sector since 2000 and is managed by its Founder and CEO, Lorenzo Spedini. Ecomembrane considers itself one of the founding fathers of the modern era membrane gasholders and is specialised in producing gasholders, heat shields for anaerobic digesters, odour control-covers made in PVC-coated fabric membrane and all parts of products needed for the combustion of biogas and the production of electricity. The Company designs, produces, markets and installs components for biogas and biomethane production plants and gas storage systems such as biogas, methane, CO₂, hydrogen. It is also involved in the photovoltaic industry with its subsidiary SBS Solar, focusing on the sale of single-axis trackers and the development and construction of turnkey systems. The Company currently has more than 70 employees and is present commercially on all continents and in 40 countries, with offices and production units in Italy and the USA. Ecomembrane has installed its products around the world, from Minnesota (USA) to South Korea, Italy, Turkey and Malaysia. The commercial network is managed directly by Ecomembrane personnel for the Italian and American market, whereas it uses a widespread distributor network for the rest of the world.*
